

## REMARKS

Three new figures, FIGS. 9a-9c, are included in a single new sheet of drawings appended hereto, which sheet is not numbered, to permit direct insertion into the application but should be considered page 2 of this paper.

The Specification is amended in several places to deal with a related means for calibrating the geometry of a multi-axis system, using a corner cube. It is believed that the means entered is within the scope of the original invention.

The Claims are amended to include five new Claims 32 through 36 directed to methods for calibration as described in the Specification amendments. The fee for the three independent claims is \$300, and for the five new claims beyond 20 is \$125. Kindly deduct \$425 from Deposit Account No. 08-0865.

Applicants respectfully request that the current Preliminary Amendments and remarks be entered into their pending application.

Respectfully submitted,

Robert C. Brown, Agent for Applicants
